Interior Sign Solutions

Sign Innovation to Meet Any Project Need...

Interior signs don't just complete your project, they can perfect it. That's why Identity Group offers you its Alchemy line, a unique technology that's as beautiful as it is reliable. Using a patented, compression-form process in which tactile copy is bonded to the sign substrate, rather than applied, our Alchemy products are durable and virtually tamper-proof, designed for a long-life in whatever environment you create. And with a variety of Alchemy products to choose from, your design options can take any project to another level of aesthetics and efficiency.

Thincryl™

A curvable insert product that works with all popular curved frame systems. Available in a full range of solid colors, as well as with high-resolution digital graphics.

Substrate:
Acrylic
Thicknesses:
0.030" - 0.060"
Edge Treatment:
Laser Cut
Text Options:
UV Ink Tipped, Acrylic,
Alchemy Metal
Alchemy Metal Text Options:
Aluminum, Brass, Bronze, Copper,
Faux Gold, Nickel Silver, Tool Steel

Solid Surface

Materials are processed at high temperature and pressure (over 5,000 PSI) to create signage impossible to duplicate with any other process. Often purchased with integral metal graphics, this is an outstanding option for uses like museums and donor recognition projects.

Substrate:
Corian, Avonite
Thicknesses:
1/4", 1/2"
Edge Treatment:
CNC Router Cut
Text Options:
UV Ink Tipped, Acrylic,
Alchemy Metal
Alchemy Metal Text Options:
Aluminum, Brass, Bronze, Copper,
Faux Gold, Nickel Silver, Tool Steel

Clearcryl™

Thermally formed, back-painted (UV ink) acrylic signage, which combines the durability of molded acrylic with the aesthetic possibilities of second surface color.

Substrate:
Clear Acrylic
Thicknesses:
1/8" - 1/2"
Edge Treatment:
Laser Cut, Museum Polish,
CNC Router Cut, Bevel
Text Options:
UV Ink Tipped, Acrylic,
Alchemy Metal
Alchemy Metal Text Options:
Aluminum, Brass, Bronze, Copper,
Faux Gold, Nickel Silver, Tool Steel

Toughcryl™

Designed as a direct substitute for photopolymer, Toughcryl™ is available in all standard textures. An exterior rating and hemispherical Braille make this a product of choice for all classic photopolymer applications.

Substrate:
Acrylic
Thicknesses:
1/8" - 3/8"
Edge Treatment:
CNC Router Cut, Laser Cut
Text Options:
UV Ink Tipped, Acrylic,
Alchemy Metal
Alchemy Metal Text Options:
Aluminum, Brass, Bronze, Copper,
Faux Gold, Nickel Silver, Tool Steel

Colorcryl™

Fully integral colored acrylic signage, produced by a proprietary thermal fusing process. Visually stunning, durable, and available in a range of standard color options that will meet most color scheme requirements. Custom color options can be added to meet specific brand needs.

Substrate:
Colored Acrylic
• Black • Grey • Violet
• Blue • Orange • White
• Green • Red • Custom
Thicknesses:
1/8" - 1/2"
Edge Treatment:
Laser Cut, Museum Polish,
CNC Router Cut, Bevel
Text Options:
Solid Acrylic
• Black • Grey • Violet
• Blue • Orange • White
• Green • Red

Imagecryl™

Truly a game changer featuring high-resolution graphics in combination with a range of text options, resulting in signage not found anywhere else. This product features high quality graphics directly printed on the second surface of thermally formed clear acrylic.

Substrate:
A) Aluminum, B) Clear Acrylic
Thicknesses:
A) 0.080", B) 1/16", 1/8", 1/4"
Edge Treatment:
CNC Router Cut, Laser Cut
Text Options:
UV Ink Tipped, Acrylic,
Alchemy Metal

Alumacryl™ One of a Kind

A sign like no other, our patented technology can BOND tactile copy to metal substrates like Aluminum, Stainless Steel, even Metal Laminates. Its virtually chip-proof durability is only comparable to the style it brings to any professional space.

Substrate:
Brushed Aluminum, Stainless Steel, Metal Laminates
Thicknesses:
.050", Plus Choice of Backer
Thicknesses - 1/8", 1/4", 3/8", 1/2"
Edge Treatment:
CNC Router Cut
Surface Text Options:
Smooth

Formcryl™

This ready-to-paint option is the perfect substitute for photopolymer. It features multiple thicknesses, compliant braille, and an exterior-rated composition of either high-impact styrene for first surface applications, or clear acrylic for clear or back-painted applications.

Substrate:
White Styrene
Clear Acrylic
Thicknesses:
1/8", 1/4", 3/8", 1/2"
Edge Treatment:
Laser Cut
Surface Texture Options:
Smooth, Stipple, Slate

Natural

Our unique manufacturing process creates beautiful and durable signage, utilizing natural materials processed with only heat and pressure. This option creates a more eco-friendly look to your space.

Substrate:
Bamboo, Fiberboard, Plywood, Composites
Thicknesses:
1/8", 1/4", 3/8", 1/2"
Edge Treatment:
CNC Router Cut
Text Options:
UV Ink Tipped, Acrylic, Alchemy Metal
Alchemy Metal Text Options:
Aluminum, Brass, Bronze, Copper, Faux Gold, Nickel Silver, Tool Steel

Tru-Bond™

Metal-faced signage features acrylic substrates with chemically thermally fused polymer metal faces. This option is lightweight and will provide the metallic look you want.

Substrate:
Acrylic
Thicknesses:
1/4", 3/8"
Polymer Metal Face Options:
Copper, Iron, Bronze
Edge Treatment:
CNC Router Cut
Text Options:
UV Ink Tipped, Acrylic, Alchemy Metal
Alchemy Metal Text Options:
Aluminum, Brass, Bronze, Copper, Faux Gold, Nickel Silver, Tool Steel

Reflections™

Engineered to have the appearance of platinum glass, the understated elegance is achieved with pressure-formed "green edge" acrylic, back-painted silver. Most often produced with nickel silver graphics.

Substrate:
Green Edge Acrylic
Thicknesses:
1/8", 1/4", 3/8", 1/2"
Edge Treatment:
CNC Router Cut, Laser Cut, Museum Polish
Text Options:
UV Ink Tipped, Acrylic, Alchemy Metal
Alchemy Metal Text Options:
Aluminum, Brass, Bronze, Copper, Faux Gold, Nickel Silver, Tool Steel

Cool-Light™

Fully integral photoluminescent acrylic signage. Signs manufactured with fully integral tactile elements with either the background or text photoluminescent. Code-compliant raised elements and Braille.

Material Option 1:
Acrylic with Alchemy-patented Integral Photoluminescent Infill
Material Option 2:
Photoluminescent Acrylic Sheet, Integral Tipped Text
Thicknesses:
1/8", 1/4", 3/8", 1/2"
Text Options:
Aluminum, Brass, Bronze, Copper, Faux Gold, Nickel, Tool Steel, Integral Alchemy Colors, UV Ink-Tipped Colors Chosen

Dimensional Print

With the ability to take any flat image and provide dimensional features to it, this option is perfect for promotional signage in any facility. The patent-pending technology provides a highly-detailed richness and beauty not achievable in 2D... both inside and out.

Substrate:
Standard flatbed printing materials; excludes some laminates
Print Area:
Up to 8' x 10'

Committed to the Environment

Identity Group is committed to environmentally responsible manufacturing. Our Alchemy product lines are made of recyclable acrylic and aluminum, and are manufactured in a low VOC emission facility, with all of our colorizing done with UV cure inks and coatings.
