ADA Signs
Compliant. Creative. Custom
Alchemy

Identity Group is committed to producing the most beautiful, efficient and compliant signs in the world by offering its Alchemy line, a unique technology that’s as beautiful as it is reliable. Using a patented, compression-form process in which the copy is bonded to the substrate, our Alchemy products are durable and virtually tamper-proof, designed for a long-life in whatever structure you create. Plus, each sign can have “integral” braille, making it a molded part of the sign, rather than a series of attachments or “punch-outs”.

Alchemy Products:
• Thincryl™
• Clearcryl™
• Colorcryl™
• Solid Surface
• Toughcryl™
• Imagecryl™
• Tru-Bond™
• Cool-Light™
• Natural
• Reflections™
• Dimensional Print

The Right Signs Can Be Beautiful… For Everyone.

The American Disabilities Act (ADA) set the standard for sign usage, allowing visually impaired people to efficiently navigate through your professional space, along with everyone else. Identity Group can be your authority on ADA requirements, helping your business stay compliant, as well as producing signage that appeals to all of your customers. The results are both beautiful and efficient to see and beautifully efficient to the touch.

**ADA Regulations**

### Braille
- Signage indicating permanent rooms or space must have Braille
- Grade 2 & Dome shape
- Shall be a direct translation and located below the copy
- For multiple lines of copy, Braille shall be located below entire text
- Shall be lower case except for proper nouns, individual letters, names, or acronyms
- Directional and informational signage does not require Braille

### Copy
- ADA 5/8” minimum - 2” maximum height
- Tactile - Raised 1/32” minimum
- Located directly below pictogram, when applicable
- Line spacing shall be between 135% - 170% the height of the copy
- Characters shall contrast as much as possible with their background

### Font Restrictions
- San Serif
- 15% maximum stroke width to letter height ratio
- ALL CAPS
- Must NOT be: *italic, oblique, script, decorative, bold, or UNUSUAL* in any way

### Finish & Contrast
- Signs shall have a “Non-Glare” finish
- Textured backgrounds shall be kept to a minimum as to not affect legibility
- Braille does not need to contrast with its background
- Signs intended to be read by touch shall not have sharp or abrasive edges

### Title 24 California
- Men - 12” equilateral triangle
- Women - 12” diameter circle
- Unisex - Triangle on 12” circle
- 1/4” thick
- Does not take the place of required tactile ADA sign
- Mounted on door 60” from centerline to finish floor (Fig. 2)

### Installation
- Signs may not protrude more than 4” from a wall (Fig. 1)
- Flag-mounted signs & over-head signs must be mounted a minimum of 80” from the finish floor (Fig. 1)
- Vertical placement based on tactile characters location:
  - Minimum: Baseline of lowest character must be 48” above the finish floor
  - Maximum: Baseline of highest character must not extend past 60” above the finish floor (Fig. 2)
- Tactile signs shall be located at the latch side of the door, to the right of double doors. If no space is available at the latch side of the door, or to the right of double doors, the sign shall be placed on the nearest adjacent wall if no other space.
- There must be a clear floor space of 18” x 18” minimum, centered on the tactile characters. This space should not be intersected by the arc of any door swing between the closed position and 45 degree open position. (Fig 3)

The ADA Law is published in the Department of Justice Federal Register. Applicable signage regulations are sections 216.1-216.12 & 703.1-703.7. ADA Guidelines are intended as recommendations solely based on our interpretation of the actual law and ANSI standards at time of print. We will assume no liability of ADA compliance. For the official Americans with Disabilities Act Guidelines, visit [www.ADA.gov](http://www.ADA.gov).
